

Hire me to aestheticize an experience on your behalf using the tools available to me on my smartphone. The documentation of the aestheticized experience will be shared with you via USB. Some examples of experiences that might be appropriate for the project are: go on a walk somewhere in Austin, TX while you are taking a nap, eat a meal/have a drink at a restaurant/bar while you're at work, visit a store while you are spending time with your family. Of course these are just examples to help give one a better sense of the project. It will be more interesting to hear from you about what you'd like me to do. I refuse the right to fulfill your request if I feel that it is beyond my means or is something I'd be uncomfortable doing.
